THE EVENING CRITIC.

Willie Edouin, with his inimitable troupe of artists, draws largely this week with "Dreams." The stupidity of the first portion of the piece is amply recompensed by the brilliant "fun in a photograph shop" in the second. The second act is from first last a running stream of madultarated to last a running stream of unadulterated humor. All of the ladies and gentlemen of the support are perfect in their line, and this combination is the finest burlesque-dramatic that has visited us this season.

Townsend's Rendings. A brilliant programme is announced for the entertainment given by Prof. Edward C. Townsend at the parlors of the Spen-cerian Business College, Saturday evening next, for the benefit of the Bethany Free Kindergarten. This school was established by Miss Emma Groves for the training of little children living in a dangerous neighlittle children living in a dangerous neigh-borhood, and otherwise friendless and neg-lected. It is open daily in Bethany Chapel, corner Thirteenth street and Ohio avenue. See amusement column.

Solrees Dansante.

Mr. L. G. Marini, the eminent professor of the art of dancing in our city, continues his delightful monthly complimentary soirces dansante at his hall on the first Thursday of each month during the season 1831-82. They are charming affairs, and Mr. Marini is to be complimented upon the graceful manner and elegant style in which

The Bischoff Church Concert. Beginning on the evening of Friday night next six concerts will be given at the Congregational Church—ence a month—by Dr. J. W. Bischoff and his pupils. The programme will be brilliaut and varied, and the reputation of the distinguished professor, combined with the talent of his pupils, blend to make the series a complete success. Dr. Bischoff will play at least one success. Dr. Bischoff will play at least one organ solo at each concert. These concerts are more complimentary than otherwise, as the price of a ticket for the entire course is but 50 cents, reserved seats 50 cents ex-tra. Tickets for sale at Ellis', Elphonzo Youngs' and J. F. Johnson's.

The Washington & Alexandria

Manager Ridley, of the ferry line between Washington and Alexandria, is applying all his energies to the task of putting the line in good order for the winter season. The City of Washington, now at the Alexandria ship-yard, will be ready for service by or before January 1, and after that date the City of Alexandria will be withdrawn for repairs. A change may be made in the time of departure of the last boat from Washington—the 7 o'clock boat being withdrawn; but Mr. Ridley has not yet decided upon this as yet.

Attention is called to the anomalous condition in which the grade of passed assistant engineer stands with regard to pay, and it is recommended that their pay be graduated on the basis of length of service. Commodore Jeslers, chief of the Bureau of Ordnance, says in his annual report that the most important question in armament now pressing for attention is the manufacture of suitable high power rifled cannon for the navy, and that steel is the proper material to be employed in the construction of such guns is admitted by most naval men. Attention is called to the anomalous con

It is also apparent that a comparatively small gun is more easily manufactured than a larger one, and that in the endeavor to effect the production of cannon it would be best to attempt the smaller calibres first. Beyond the conversion of a certain num-ber of smooth-bore guns into rifles, and the introduction of an excellent form of breech introduction of an excellent form of breech closure, our guns are in the same state as they were twenty years ago. The contest between gun and armor having been deter-mined in favor of the gun, it is recom-mended as proliminary to the proper arma-ment of the navy that Congress appropriate for the construction of ten steel guns, for which estimates are submitted.

The Christianey Case. The Christianey Case.

The cross-examination of Mrs. Mary F. Lugenbeel was concluded yesterday evening at the session of the examiner in the Christianey divorce suit. The only point of interest brought out was one showing that the witness was not a competent judge of the hand-writing of her daughter. A portion of a letter, written by Mrs. Christianey to the rhusband, and which she, at the index of was hers, was shown to the witness. She was directed to look at it carefully, which she did not the witness. She was directed to look at it carefully, which she did not then asked if the letter was heard from Abraham Lever, who went off page 1.

Internal Revenue Report.

The report of Gen. Raum, Commissioner of Internal Revenue, shows that the receipts from excise taxes during the first four months of the present fiscal year have been \$50,876,970, being \$7,061,722 in excess of the receipts for the corresponding period of last year. If this increase is maintained, the receipts for the fiscal year ending June 30, 1872, will be fully \$157,000,000. During the past five fiscal years \$602,301,797 have been collected by the officers of the Internal Revenue. Department and paid into the been collected by the officers of the internal Revenus Department and paid into the Treasury without loss to the Government. The whole expenditure of the Internal Revenus Bureau during that period was \$2,197,002, being 3.37 per cent. of the whole amount collected. The Commissioner recommends that a law be passed by Con-gress giving the United States courts juris-diction in cases where revenue officers are gress giving the United States courts juris-diction in cases where revenue officers are assaulted or killed while in the discharge of their duties, and he also recommends that the widows of revenue officers who have been killed while in the line of duty be pensioned. The Commissioner also goes into an elaborate argument on the general subject of civil-service reform, and undertakes to make various recommendations as to tenure of office and other details.

The Senate Offices. Opinions regarding the prospects of gen-tlemen who hope to get offices in the new Senate are by no means unanimous. On the contrary, quite the reverse. They say that so far as the Republican Senators are that so har as the Republican Senators are concerned, there is unanimity in the desire to elect new officers to fill the several posi-tions in the Senate organization; but the difficulty is that Judge Davis (without whose vote nothing can be done) has made whose vote nothing can be done) has made known his purpose to oppose the removal of any official "unless for cause;" that gentlemen, whose capability to discharge the duties of the places they fill is known, shall not be discharged simply to make place for ambitious outside politicians. This being the state of affairs, it is believed there will be no reorganization of the Sen-ate offices, atthough it is supposed that some changes will be made in subordinate places, and that Chief Clerk Shober and the Sergeant-at-Arms will see the propriety of em-ploying a few Republicans among their re-

A steamer running between New York A steamer running between New York and Havana had a novel experience while off the Capes of Delaware, recently. She came upon an immease number of whales, the school being twenty miles long and a quarter of a mile wide. The animals were of all sizes and disported themselves in the water as if enjoying it. Suddenly the ship shook from stem to stern as she struck a water as if enjoying it. Suddenly the ship shook from stem to stern as she struck a monster about 60 feet long, which was attempting to cross her path. The whale was cut in halves, which passed astern on either side, while the water was dyed red with his blood. The steamer came to a standstill and her stem was examined. It was found to have escaped injury, but the steering geer was slightly damaged. This was soon repaired and the vessel proceeded, but ten minutes after she started up there was another and a heavier shock which almost threw the passengers from their feet. Another whale had been cut in two. The body of this animal passed under the vessel and struck the propeller with great violence. The vessel's course was then changed, and she soon left the whales behind.

Bulwer always wrote in perfect isolation. His study was remote, and the least noise was forbidden. While writing the floor about him would be strewn with books and papers, and so jealous was he of the privacy of this sanctum that few were ever admitted within its walls. In his latter days he nover gave more than three hours to composition. After silently eating a light breakfast he would enter his study at 10, and regularly at 1 o'clock he would emerge, his work over for the day.
